You get to see all the boats coming out and try to sail. You saw that image of someone fly boarding, when you strap on the pack and fly the jet pack. I did that in the cayman islands. If you ever get a chance to do it, do it. It is so awesome. I got up about 12 feet off of the water t is incredible. It is awesome. It is like a jet pack and you can do this at this **boat show**. It starts today and goes through sunday. If youre a dad, the first 200 dads get a free gift but everyone needs to try this. You got to try it. We got tickets for the entire audience to go. 12:25:10.00 All right, looking for ideas on how to spend time with dad this weekend? If you like if he likes the water hell probably love the **boat show**. Perhaps youre in the market for a board but theres no need to buy one at all. No need to buy one yourself. Two words fractional ownership. The **boat show** begins today, runs through sunday. Basically any kind of interest you have in boating, youll be able to find out here at the 31st street harbor beginning later this afternoon. This is jason, and he has a company, its a fractional boat ownership? Is that correct? Its a yachting club, we have rentals, charter, and fractional ownership. How did you ever conceive of this idea? Whats the basic premise? You can access a valuable asset at a very little cost. And get into boating with limited amount of time to spend. Very wealthy people do this with private jets, i was in the private jet industry for 10 years and learned that program, when i moved to chicago i wanted to get into boating, didnt have a lot of time to expend was looking for a fractional program and didnt find anything that worked for me, so i started a company. Lets talk about options. What do you offer? We offer boat rentals for two hours at a time, you can cruise the chicago river, you can also do a tour of monroe harbor, that starts at \$100 an hour. And then we offer yacht cards, which are single season leases aboard larger vessels, 35 to 50 feet, and we can train you how to operate that boat or you can hire a captain. And those start around \$5,000 to 18,000 for that program. For a number of days. We also have our fractional ownership program, where you can be an owner of a large vessel, million dollar vessel at a fraction of the cost, an eighth of the cost, and we take care of everything maintenance, cleaning, fueling, we do all the work, and its fully turnkey. And then in terms of what you can do for people in terms of dates? Were limited, i dont know, four or five months maybe in chicago? Yeah. Weve got four, five months of good weather, so we break the calendar down into premium days and peak days and standard days. So we get all the members together to have a party at the beginning of the season, sometime in april, and they get to choose the days they want based off an nfl style draft. And they get a draft pick and we go down the list, they pick a day and then goes to the next member, and so on. So they have control over their schedule to some degree. And once the season starts theyve got the ability to trade with other members, and show them share the boats together or swap days. Flexibility is key. Exactly. How much do you love your job? I know its a job, but its not a job. Its the best. We dont hang around people outside am day long, everyone is always having fun. It doesnt get better than this. Last thing, for more information people can go where? Advantageyachtclub.Com, and we have a small shop for chicago, vycchicago.Com. And youll be here. Well be at the **boat show** all weekend. Booth 126. Very good. Thank you so much for your time. What did you say? Why didnt we think of that? Hello! Fractional boat ownership. Missed it by that much. Coming up, we have your full forecast for the weekend, and top stories (TRT=03:22)

Mayor filner says hes planning to announce a bi- national committee for the **san diego-tijuana** bid for the 20-24 summer olympics. He and the mayor of tijuana will be co-chairs. K-u-s-is ed lenderman has more. Were going to make, do a binational proposal, the first binational olympics in history, world history. When mayor filner first began talking about teaming up with tijuana for a cross-border olympics bid, the idea

was met with a great deal of skepticism. Because well. There are a number of major obstacles but one of them is a doozy the international olympics charter. It doesn't allow for bi-national games. You know rules. Those rules don't deter me. That just sets a challenge. Mitt Romney told me that the most important thing is the uniqueness of the situation. There's never been a binational olympics that's the uniqueness, the rules will accommodate that and he gave us who to talk to and the process and were going to proceed. Filner says Romney, who has a home here and was president of the 2002 Salt Lake City Summer Olympics will continue to advise the newly announced bi-national committee. Filner had previously said he wanted Romney to serve as honorary chair of the effort. Unless you've been living in a cave, you know our mayor likes to think Big has mentioned it in regard to our Balboa Park Centennial. And he uses the phrase here. Because thinking big in this instance says the major involves more than a world wide sporting event here Mister Filner uses the word legacy. And ed, everything with do with a city project from now on is going to be in the context of an olympics proposal, everything that's sort of mundane takes on new significance, people ask about a new Chargers stadium, well now were going to think about an olympic venue, an olympic village afterward becomes affordable housing, we have to get athletes around the city, public transportation for the city of **San Diego**. Business people and community leaders says Filner are already at work we've got logos, we've got proposals going. Assets already in place in Tijuana and **San Diego** will be inventoried. 05:38:31.00 Enter traffic info here once again north county residents and environmentalists are battling over a toll road that was first rejected back in 20-08. This plan would extend state route 241 near san juan capistrano five miles to the south. Thats only a portion of the original 16-mile proposal which would have gone to san onofre state beach. But opponents fear thats still the overall goal. Its a typical ploy to go to a government agency and ask for the simple piece first -after youve been rejected- and then have to build again, the rest of your project. Unty supervisor dave roberts joined a packed house of those opposed to the project at a meeting of the water quality control board. The "transportation corridor agency" seeking to build the project needs a permit to continue. The agency argues the highway extension is need to relieve traffic along the i-5 and that theres strong support in orange county. In the end, the water quality control board decided against granting the permit saying they didnt have enough information about the total scope of the proposed project.
