    - Use of pentry equipment's with open fire.
  - Water ingress (examples):
    - Design category
    - Location and use of possible valves at hull penetrations.
    - Maximum recommended loading of boat.
    - Maximum recommended engine power
  - Driving instructions:
    - Use of power level and related steering equipments
    - Location and clarification of control buttons.

## **Annex II components:**

Below listed equipments shall be CE-marked according to requirements in annex II.

- Fuel tanks:
  - shall be separately CE-marked if they are not specifically designed for the boat model in question and having a volume > 27 litres.
  - Manufacturer names and test pressures must be marked on the tank in all cases.
- Fuel hoses shall be CE-marked except hoses between the tank and an outboard engine.
- Electrical devices in inboard petrol engine rooms must be ignition protected and CE-marked. Not required in diesel engine rooms.
- Steering wheels (also wheels on sailing boats)
- Steering cables or hydraulic hoses.
- Deck hatches and portlights

Boat model specific fuel tanks, steering system components, hatches and portlights are covered by the boats CE-mark.
